

# GLOW > NEXT

## GLOW 2013 'URBAN PLAYGROUND'

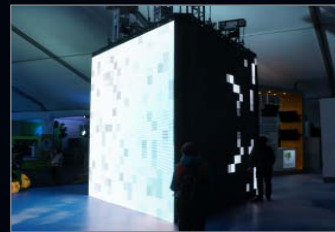

From 9 until November 16th 2013, the city of Eindhoven will be the scenery for the eighth edition of GLOW. Due to the huge success of GLOW in the inner city, in 2012 the organization decided to expand the festival with a separate section on Strijp-S, named GLOW NEXT. In the future GLOW NEXT has to become an experimental place where innovative lighting development is presented in the context of an international meeting forum. This year the installations at Strijp-S are characterized by their innovative and interactive character.
