

# m0tifs

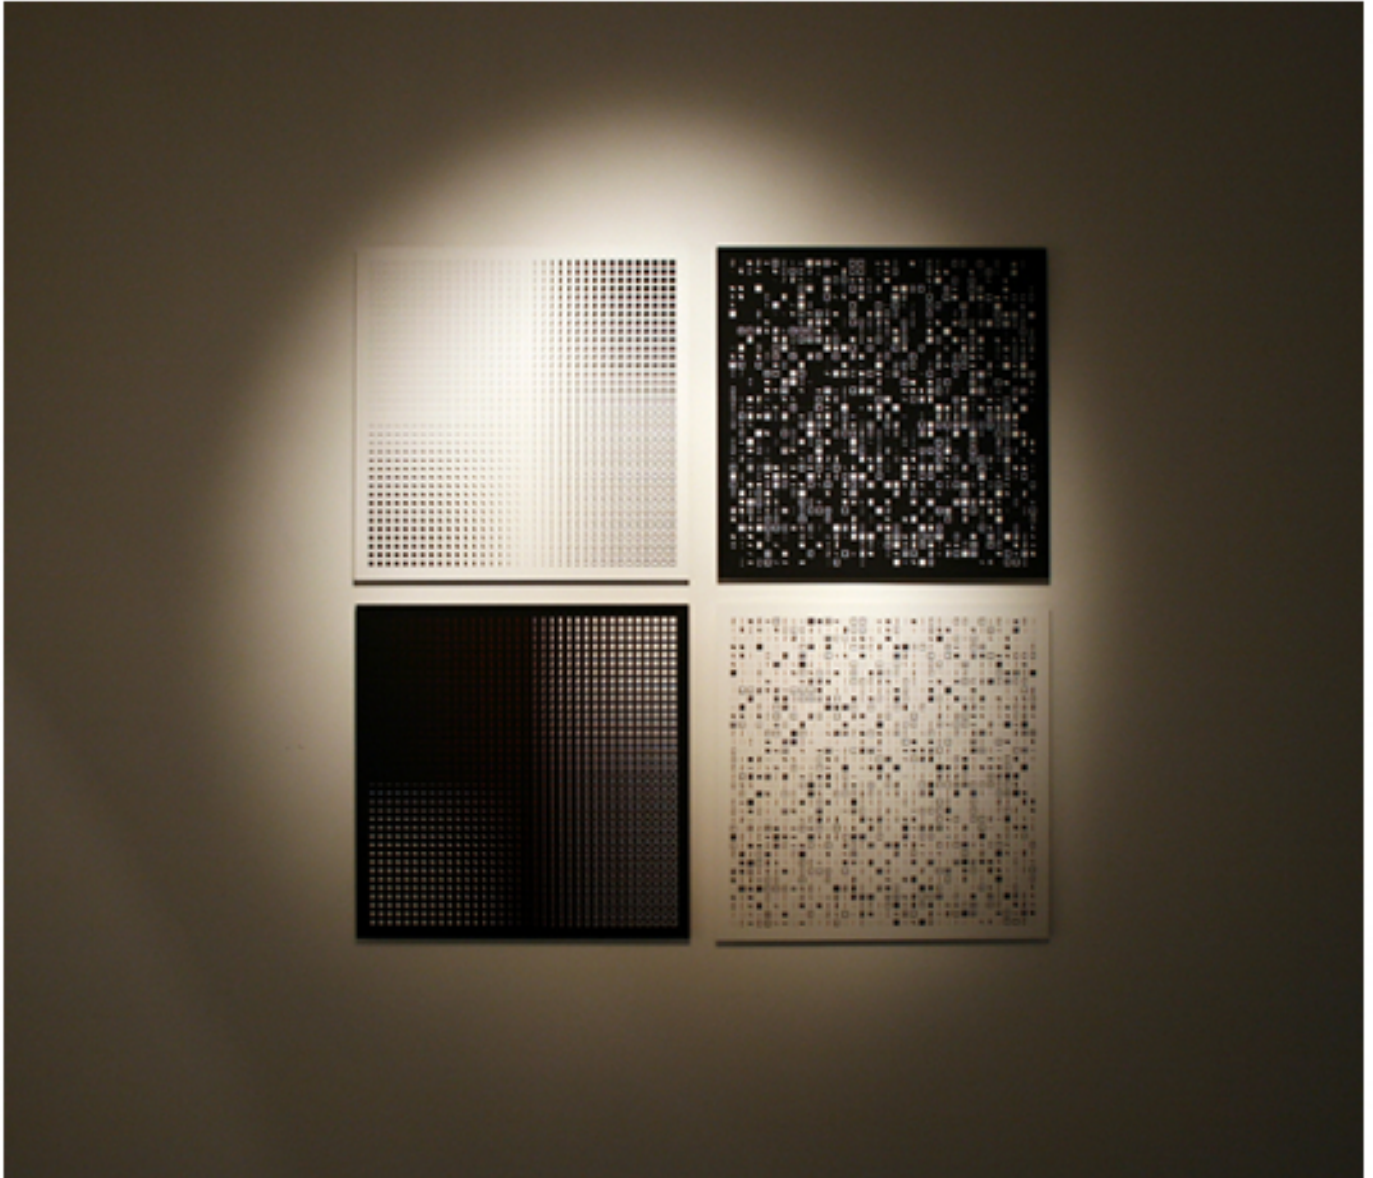

**solo exhibition of LAb[au]  
at  
numeriscausa gallery  
Paris, France**

30 April 2009 - 06 June 2009

presented projects by LAb[au]:  
framework f5x5x1  
framework notation  
pixflow, artconsole  
swarmdot, artconsole

LAb[au], an artists group located in Brussels, exhibits at numeriscausa gallery several generative artworks produced between 2006 and 2009. Grouped under the title “m0t1fs”, patterns in English, these works are all based on simple elements which principal qualities are to be indivisible units, each one defining a given scale of space: pixels, vectors, bits or frames. Thanks to their multiplication and their progression in time, these elements are driven by simple and non random rules of interaction in between them or in between one of these elements and its spatial-temporal context, which leads to complex patterns whose aesthetics are direct transpositions of its algorithmic processes. These generative works take part of LAb[au]’s general research on an aesthetic/language specific to digital technologies/media.

From April 30 to June 6 2009  
Tuesday – Saturday 14:00 to 19:00  
or on appointment

Opening April 29 from 18:00 to 22:00  
Galerie numeriscausa  
53 Bd Beaumarchais  
75003 Paris
