# A Robotic Kaleidoscope That Hangs From the Ceiling

Do you like kaleidoscopes? Do you like robots?

Tessel, created by David Letellier & Lab[au], is a robotic kaleidoscope suspended from the ceiling. It consists of 40 separate mirrors, which join to form a 13'x6'

Eight of those mirrors hide speakers, and 12 of to motors. The moving mirrors respond to the : configuration, and what results is aural, kinetic

If you happen to be in Brussels, it's on display a through December 12th. If you're not in Brusse video above, while wearing black and sitting in everything is painted dove gray. It'll feel almos

Today and Tomorrow has [a couple more pics](#).
